Re: Release of Type-57P Butterfly Valve – all materials and sizes

Effective immediately, Asahi/America, Inc. introduces the Type-57P butterfly valve. The Type-57P features a durable injection molded PVC, CPVC, PP or PVDF body and disc with EPDM, Nitrile or FKM seat and seals, and 316 stainless steel non-wetted stem. A redesigned, high visibility throttle positioning plate has been added to Lever operator models, which features an opening degree legend in 10° increments, making accurate throttle positioning between 0° closed and 90° open possible. For high cycle life and smooth torque, seat/disc bushings have been fitted with dual O-ring seals. Additionally, two molded tag holes are positioned in the valve body for user-defined valve identification purposes. The Type-57P is available now in ANSI wafer or lug style connection, sizes 1-1/2" - 8" in both lever and Plasgear™ operator and 10" – 14" with Plasgear™ operator. Additionally, the Type-57P can be actuated both electrically and pneumatically. Various manual accessories can be installed, as well.

Specification:

- Products: Type-57P Style Butterfly Valve
- Sizes/Models: 1-1/2" – 14" ANSI Wafer and Lug style with Lever or Plasgear™ operator
- Materials: PVC, CPVC, PP AND PVDF body and disc, EPDM, Nitrile or FKM seat and Seals

Interchangeability:

- The Type-57P shares the same face to face dimension as all like size Type-57 butterfly valves

Availability:

- The Type-57P will begin being shipped once existing Type-57 inventory is depleted. Valve parts are in stock, ready to be assembled, tested and shipped to order.

Pricing:

- Pricing is identical to model T57 reflected in List Price sheet #52A. All T57P part numbers feature a 2-digit year of introduction prefix "17" followed by the existing 7-digit T57 part number scheme.
